

Lesson 7: Delineate and Evaluate an Argument: Industrial Organic Farming

Presentations

- Lesson 7: Delineate and Evaluate an Argument: Industrial Organic Farming

Standards

8R1:

8R2:

8R6:

8R8:

8SL3:

Learning Targets

I can delineate and evaluate the argument in *The Omnivore's Dilemma*, assessing whether the reasoning is sound and the evidence is relevant and sufficient. (8R8)

I can delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced. (8SL3)

Ongoing Assessment

Opening A: Entrance Ticket: Unit 1, Lesson 7 (8R1)

Work Time A: Gist on sticky notes

Work Time B: Delineate an Argument: *The Omnivore's Dilemma*, Section 5 graphic organizer (8R8)

Closing and Assessment A: Delineate an Argument: "Farmers Markets" graphic organizer (8R8, 8SL3)

Agenda

Opening

Engage the Learner (5 minutes)

Work Time

Read *The Omnivore's Dilemma*, Section 5 (15 minutes)

Delineate Arguments: *The Omnivore's Dilemma*, Section 5 (15 minutes)

Closing and Assessment

Delineate an Argument: "Farmers Markets" Video (10 minutes)

Homework

Delineate an Argument: *The Omnivore's Dilemma*, Section 5

Preread Anchor Text

Teaching Notes

Purpose of lesson and alignment to standards

8R1 – Opening A: Students complete an entrance ticket by citing evidence from the text.

8R8 – Work Time B: Students complete sections of the Delineate an Argument graphic organizer as they review and evaluate the argument and claims in section 5 of ***The Omnivore's Dilemma***.

8SL3 – Closing and Assessment A: Students watch "Farmers Markets" and evaluate the speaker's argument and claims in a discussion with peers.

The Think-Pair-Share and Back-to-Back and Face-to-Face protocols are used in this lesson. Protocols are an important feature of the curriculum because they are one of the best ways we know to engage students in discussion, inquiry, critical thinking, and sophisticated communication. A protocol consists of agreed-upon, detailed guidelines for reading, recording, discussing, or reporting that ensure equal participation and accountability in learning.

In this lesson, students practice becoming effective learners while collaborating with partners as they learn how to delineate and evaluate arguments and analyze their validity. This will help students strengthen their reading and analysis skills and will make them better able to formulate their own opinions and arguments.

Opportunities to Extend Learning

In this lesson, students read excerpts from chapters 10 and 11 of *The Omnivore's Dilemma*. Provide time for students to read and review the entire chapters with peers or individually.

Invite students to research more about industrial organic farming to better understand details of farm operations, history, products, and impact. Students can share what they learn in small groups or with the class.

Invite students to find additional texts and resources from conflicting viewpoints that center around the same topic as this lesson's excerpts from *The Omnivore's Dilemma* (industrial organic farming). Support students to identify where irrelevant evidence is presented or in identifying false statements and fallacious reasoning that may exist.

Find additional interviews, speeches, or videos on industrial organic farming, and allow students to evaluate the speaker's point of view, reasoning, and use of evidence and rhetoric. Help students identify any fallacious reasoning and point out any exaggerated or distorted evidence.

Students can research any industrial organic farms that operate in your state or area. Encourage students to learn more about their operations, practices, and production.

As appropriate for students, use the Delineate an Argument graphic organizer in Work Time B and Closing and Assessment A with less or more scaffolding.

In Closing and Assessment A, students view "Farmers Markets" from *Nourish: Short Films: 54 Bite-Sized Videos about the Story of Your Food*. Alternatively, the video can be accessed online at <http://eled.org/0234>. Then they discuss the argument presented and the supporting points and evidence. Invite students to fill out the optional Delineate an Argument: "Farmers Markets" graphic organizer in addition to their discussion. Similarly, provide time for students to view an additional video of their choice from this site, and fill out a corresponding graphic organizer.

How this lesson builds on previous work:

This lesson applies work students completed previously in delineating arguments and analyzing soundness and relevancy of evidence. In this lesson, students work on these same skills with increased independence, leading up to working completely independently later in the module.

Support All Students:

Presenting learning targets in writing, orally, and, if possible, accompanied by symbols, will help students to understand the language within them.

Note that section 5 of *The Omnivore's Dilemma* addresses the concept of organic food. Pollan explains that organic food is grown without pesticides or fertilizer chemicals but is grown in far-away farms and sold by chain stores like Whole Foods, rather than grown and sold locally like organic used to imply. He raises the question of whether organic food is worth the extra cost and implies that it may be because we do not know the long-term effects of pesticides and fertilizers in our food, especially for children. He also discusses free-range chickens and the reality that these chickens are actually raised confined and do not go outside—they may be fed to grow so quickly that they cannot even walk. Some students or their families may find these topics to be new, challenging, or upsetting depending on their own eating habits, knowledge, access, or other factors. These topics may also be challenging for students who live in food deserts where they may not have access to organic food. Allow for time to process and respond to these topics during individual, small group, or whole-class discussion, and reach out to families as needed. Use thoughtful, strategic pairings, and discuss what types of food are available or affordable in students' own neighborhoods and communities.

In Work Time A, provide choice in how students read the excerpt: some students may prefer to read independently and silently, while others (especially ELLs) may wish to read aloud in groups with peers and/or with support. Still others may wish to read silently for a few pages and then process with a group. This format of choice could potentially be built into the reading time within each lesson.

As in previous lessons, in Work Time A, present additional options for recording gist rather than just the sticky note, such as using a separate notebook, using a graphic organizer, using highlighters and annotating, or using a voice recorder. Give students options for expressing their understanding of gist (oral, written, drawing). Also, build in different options for expressing comprehension of the text (written reflection, voice recording, discussion with partners/groups).

Students may need additional support with recording their answers on their graphic organizer in Work Time B. Sit those students in a group together to grow their independence with identifying the arguments and evidence with support when necessary.

When grouping students in partners to review the Delineate an Argument graphic organizer in Work Time B, group ELLs with partners who have more advanced or native language proficiency. The partners with greater language proficiency can serve as a model, initiating discussions and providing implicit sentence frames, for example. Use the same grouping in future lessons if this grouping was successful. This will support students in building trust and becoming more comfortable and confident with their peers.

Provide students with a link to the video used in Closing and Assessment A through sites such as Google Classroom or similar means so they can review the content multiple times at their own pace instead of in the large group setting.

If watching the videos in Closing and Assessment A presents complications, read the transcript from videos aloud (from the blog posts associated with each video).

Assessment guidance:

Check gist statements to ensure students are recording quick notes about what the text is mostly about.

Monitor and collect students' Delineate an Argument graphic organizers during Work Time B to ensure students are on the right track for capturing accurate main claims, supporting points, and related evidence on an increasingly independent and accurate level.

Down the road:

In the next lesson, students will go back to examining the structure of specific paragraphs in *The Omnivore's Dilemma*, analyzing how the structure of supporting paragraphs contributes to developing key ideas in the text. Students will again discuss the author's point of view and examine how the author responds to or acknowledges conflicting evidence and viewpoints.

Students will have one more lesson where they can practice delineating an argument and analyzing evidence prior to their mid-unit assessment.

In advance:

Prepare:

Entrance Ticket: Unit 1, Lesson 7 (one per student)

Synopsis: *The Omnivore's Dilemma*, Section 5 (one per student)

Delineate an Argument: *The Omnivore's Dilemma*, Section 5 graphic organizer (one per student)

Homework: Delineate an Argument: *The Omnivore's Dilemma*, Section 5 (one per student)

Preread the text sections for today's Work Time A, and review the Text Guide to ensure understanding of the material and content.

Ensure there is a copy of Entrance Ticket: Unit 1, Lesson 7 at each student's workspace.

Prepare the necessary technology to view the video used in Closing and Assessment A.

Post the learning targets and applicable anchor charts (see Materials list).

Technology & Multimedia

Closing and Assessment A: Cue up the "Farmers Market" video from *Nourish: Short Films: 54 Bite-Sized Videos about the Story of Your Food*, or provide links for students to view it on their devices (<http://eled.org/0234>).

Continue to use the technology tools recommended throughout previous modules to create anchor charts to share with families; to record students as they participate in discussions and protocols to review with students later and to share with families; and for students to listen to and annotate text, record ideas on note-catchers, and word-process writing.

Supporting English Language Learners

Important points in the lesson itself

To support ELLs, this lesson uses repeated routines and protocols to support productive analysis and discussion. Students read an excerpt from *The Omnivore's Dilemma* and delineate an argument. In addition to reading from the text, students also watch a video. Linguistic input from different types of media will benefit ELLs and help to reinforce essential concepts related to the topic of food production.

ELLs may find it challenging to analyze an oral argument. When analyzing an argument in a text, students can refer back to information as needed. When analyzing an argument in a video, students will not have the opportunity to do so in the same way. Consider using English-language subtitles while showing the video to offer multiple forms of linguistic input.

Lesson 7: Delineate and Evaluate an Argument: Industrial Organic Farming

Description

Teach, Lesson 7: Delineate and Evaluate an Argument: Industrial Organic Farming to your students with this slide presentation. If you want to edit these slides click on the Edit toggle and then click on the presentation. If you just want to browse the slides, you can click directly on the presentation.

Presentation

- Lesson 7: Delineate and Evaluate an Argument: Industrial Organic Farming

Text Activity: Text Guide: Lesson 7, Section 5

Lesson 7, Section 5

Pages 133–134, beginning with "Industrial Organic" and ending with ". . . under federal organic rules" just prior to "Hippie Food"

Pages 147–150, beginning with "More Big Organic: Meet Rosie the Free-Range Chicken" and ending with ". . . and catch a cold" just prior to "My Organic Industrial Meal"

Pages 153–155, beginning with "Is Organic Better for You?" and ending with ". . . already banned in Europe" just prior to "Is It Health Food?"

Pause to define the following vocabulary and ask the following questions as needed.

Vocabulary

monoculture (133): the cultivation or growth of a single crop, plant, or livestock species, variety, or breed in a field or farming system at a time

industrial (133): relating to large-scale business or industry

automated (149): a process in a factory or office operated by machines or computers, in order to reduce the amount of work done by humans

barracks (149): buildings or group of buildings used to house a specific group of people, such as soldiers, laborers, or prisoners

atrazine (155): herbicide to control weeds, especially in corn crops

herbicide (155): a substance that is toxic to plants, used to destroy unwanted vegetation, especially weeds

Questions

page 133 "Because this food chain has elements of both, I call it 'industrial organic.'"

What does Pollan mean when he refers to this organic food as "industrial organic"? He is referring to the fact that although the food he is describing is organic and is produced without pesticides, it is still produced in an industrial setting.

page 134 "The government rules about organic food allow companies to make organic high-fructose corn syrup—words I never expected to see combined."

Why was Pollan surprised to see these words combined? He was surprised because one typically thinks of organic food as healthy food, not food that would contain HFCS.

page 148 "Ah, you ask, what about the 'free range' words on Rosie's label? Doesn't that mean they can 'free range' outside? Not exactly."

What does Pollan mean by "not exactly"? He means that although these chickens are technically labelled as "free range," they are accustomed to not going outside, and by the time the option exists to go outside, the chickens are conditioned to stay indoors and most do so.

Entrance Ticket: Unit 1, Lesson 7

Directions

As you enter class, respond to the following prompts.

QUESTION 1

4 points Written Response

Retrieve your copy of *The Omnivore's Dilemma* and turn to page 130, locating the sentence "Forty years ago there was no such category as 'organic' food." Read from this sentence until the end of page 132.

In the space below, write down one or two quotes from this section that stand out to you about the birth of organic food.

Be ready to share your sentences with a peer.

Note for Evaluating Responses

Responses will vary, but may include:

- "The word *organic* has become a kind of shorthand for food that is healthier or more natural or chemical-free" (130).
- "Once upon a time all food was 'organic'" (131).
- "The first Earth Day was held in April 1970. And the idea of organic food began to catch on" (132).
- "[T]he word *organic* meant more than a method of farming. It meant living in harmony with nature instead of trying to control it" (132).

Delineate an Argument: The Omnivore's Dilemma, Section 5 Graphic Organizer

QUESTION 1

4 points Fill in the Blank

Answer the questions in the graphic organizer, providing information from the text section for the written responses.

Text Excerpt or Video	Section 5 of <i>The Omnivore's Dilemma</i>
Purpose	What is the author's purpose for writing this text? Write the correct letter in the space below. Option A. The author's purpose is to convince readers to buy organic produce from stores like Whole Foods. B. The author's purpose is to share details about the future of industrial organic farms and practices. C. The author's purpose is to present details to readers that help them understand the reality of working conditions on industrial organic farms. D. The author's purpose is to inform people about the reality of industrial organic farming practices.
Main Claim	What is the main claim of this section of text? Write the correct letter in the space below. Option A. The popularity of industrial organic food is helping to bring down the cost of organic food in large national food chains. B. Industrial organic farms support better conditions and wages for workers they employ. C. Industrial organic food is only a partial improvement over industrially produced food.

	D. Industrial organic food is proven to be healthier for humans and animals and more sustainable for the environment.
Supporting Point 1	What is one supporting point for the main claim? Write the correct letter in the space below. Option A. Although fed organic foods, many cows are raised in factory farm conditions. B. Workers get exposed to fewer chemicals on industrial organic farms and therefore live healthier lives. C. Although more well-known grocery chains, like Whole Foods, are selling organic foods, the cost of organic food is increasing. D. Studies have proven that organic food is healthier for humans and the environment.
Relevant Evidence Used to Develop Point	What is one piece of relevant evidence that supports this point? (8R8) •
Supporting Point 2	What is another supporting point for the main claim? Write the correct letter in the space below. Option A. Even with labels like "free-range," many of the same factory farm methods for raising chickens are in place. B. Chickens that are raised in industrial organic farms grow so rapidly that their feet can't keep up with their weight. C. Organic factory farms are better than conventional factory farms because they use only some pesticides and harmful chemicals. D. It is most important to consider farm workers' wages and treatment when making food choices.

Relevant Evidence Used to Develop Point	What is one piece of relevant evidence that supports this point? (8R8) •
Sufficient Evidence	Is the evidence presented in this text sufficient? Why or why not? (8R8) •
Sound Reasoning	Is the reasoning shared in this text section sound? Why or why not? (8R8) •

Note for Evaluating Responses

Text Excerpt or Video	Section 5 of <i>The Omnivore's Dilemma</i>
Purpose	What is the author's purpose for writing this text? Highlight one of the options below. (8R6) A. The author's purpose is to convince readers to buy organic produce from stores like Whole Foods. B. The author's purpose is to share details about the future of industrial organic farms and practices. C. The author's purpose is to present details to readers that help them understand the reality of working conditions on industrial organic farms. D. The author's purpose is to inform people about the reality of industrial organic farming practices. D. The author's purpose is to inform people about the reality of industrial organic farming practices.
Main Claim	What is the main claim of this section of text? Highlight one of the options below. (8R8) A. The popularity of industrial organic food is helping to bring down the cost of organic food in large national food chains. B. Industrial organic farms support better conditions and wages for workers they employ. C. Industrial organic food is only a partial improvement over industrially produced food. C. Industrial organic food is only a partial improvement over industrially produced food.

	D. Industrial organic food is proven to be healthier for humans and animals and more sustainable for the environment.
Supporting Point 1	What is one supporting point for the main claim? Highlight one of the options below. (8R8) A. Although fed organic foods, many cows are raised in factory farm conditions. A. Although fed organic foods, many cows are raised in factory farm conditions. B. Workers get exposed to fewer chemicals on industrial organic farms and therefore live healthier lives. C. Although more well-known grocery chains, like Whole Foods, are selling organic foods, the cost of organic food is increasing. D. Studies have proven that organic food is healthier for humans and the environment.
Relevant Evidence Used to Develop Point	What is one piece of relevant evidence that supports this point? (8R8) Responses will vary, but may include: • "The cows on these 'farms' spend their time in a fenced lot eating organic grain except for the three times a day they are hooked up to milking machines" (133). • "Organic beef is often raised in 'organic' feedlots" (134).
Supporting Point 2	What is another supporting point for the main claim? Highlight one of the options below. (8R8) A. Even with labels like "free-range," many of the same factory farm methods for raising chickens are in place. A. Even with labels like "free-range," many of the same factory farm methods for raising chickens are in place. B. Chickens that are raised in industrial organic farms grow so rapidly that their feet can't keep up with their weight. C. Organic factory farms are better than conventional factory farms because they use only some pesticides and harmful chemicals. D. It is most important to consider farm workers' wages and treatment when making food choices.
Relevant Evidence Used to Develop Point	What is one piece of relevant evidence that supports this point? (8R8) Responses will vary, but may include: • "The machinery can turn a chicken from a clucking, feathered bird into a shrink-wrapped pack of parts in just ten minutes" (149). • "Twenty thousand is a lot of chickens. Inside the shed they formed a moving white carpet that stretched nearly the length of a football field" (149). • "But, as I have said before, the birds never go outside, even when the doors are opened" (150).
Sufficient Evidence	Is the evidence presented in this text sufficient? Why or why not? (8R8) Responses will vary, but may include: • The evidence presented in this section is sufficient because it presents enough information that helps the reader understand more about the reality of industrial organic farm practices. Michael Pollan shares evidence on the reality of organic chickens and how they are grown and processed rapidly. It

	makes the reader consider aspects of industrial organic farming practices that are only slightly better than industrial practices, which helps them understand that the claim Pollan presents makes sense.
Sound Reasoning	Is the reasoning shared in this text section sound? Why or why not? (8R8) Responses will vary, but should show understanding of the author's reasoning. Sample response: The reasoning in this text section is sound. The evidence is relevant and sufficient and the sentences are tied together logically so the reader can follow the author's thinking. For example, on pages 147–148 of the text, Pollan presents evidence about the reality of industrial organic chicken farms. He explains this evidence and uses it to support the point that even with labels like "free range," many organic chickens live in factory farm conditions. This reasoning helps the reader connect the ideas presented about industrial organic farming practices back to the claim about industrial organic farming only being slightly better than industrial farming.

QUESTION 2

4 points Multiple Choice 

Which of the following pieces of evidence, if the author chose to include it, would be irrelevant to the author's claim? (8R8)

- ☐ A Guidelines for establishing and operating broiler chicken processing plants are overseen by the USDA and help regulate the treatment of chickens.
- ☒ B The US population is steadily increasing, which means more eggs need to be produced. The average American eats about 250 eggs each year.
- ☐ C More consumers are seeking out organic chicken each year because of their concerns about animal welfare, health, and the environment, which requires industrial organic farms to increase production.
- ☐ D The USDA states that all chicken labeled organic means that it must be free-ranging and naturally raised, which includes being fed an organic diet.

QUESTION 3

4 points Multiple Choice 

On page 149 of *The Omnivore's Dilemma*, Michael Pollan writes: "Compared to conventional chickens, I was told, these organic birds have it pretty good."

How does Pollan respond to this conflicting viewpoint that industrial organic chickens live in "pretty good" conditions? (8R6)

- ☐ A by referencing specific practices of raising conventional chickens
- ☐ B by referencing research findings about the impacts of industrial chicken farming on the environment
- ☒ C by referencing the fact that these birds are packed together and never actually go outside
- ☐ D by referencing research findings about the advantages of increased grazing areas for chickens

Delineate an Argument: "Farmers Markets"

Graphic Organizer

QUESTION 1

4 points Fill in the Blank

Answer the questions in the graphic organizer, providing information from the video for the written responses.

Text Excerpt or Video	Video – "Farmers Markets"
Purpose	What is the author's purpose for this video? Write the correct option in the space below. Option: A. The author's purpose for this video is to inform viewers that shopping at farmers markets is important. B. The author's purpose for this video is to prove that shopping at farmers markets is the only way to access healthy food. C. The author's purpose for this video is to present an academic argument in favor of shopping at farmers markets. D. The author's purpose for this video is to present the pros and cons of shopping at farmers markets compared to shopping at conventional grocery chains.
Main Claim	What is the main claim of this video? (8R8, 8SL3) •
Supporting Point 1	What is one supporting point for the main claim? Write the correct option in the space below. Option: A. Shopping at farmers markets helps support the farmers who bring communities good, wholesome, clean foods.

	B. Shopping at farmers markets helps the environment because the food is traveling short distances and there is less fuel required for transporting it. C. To ensure consumers are buying healthy foods, they should only shop at farmers markets. D. Shopping at farmers markets will help consumers enjoy healthier food and pay less for it.
Relevant Evidence Used to Develop Point •	What is one piece of relevant evidence that supports this point? (8R8)
Sufficient Evidence •	Is the evidence presented in this video sufficient? Why or why not? (8R8)
Sound Reasoning •	Is the reasoning shared in this video sound? Why or why not? (8R8)

Note for Evaluating Responses

Text Excerpt or Video	Video – "Farmers Markets"
Purpose	What is the author's purpose for this video? Highlight one of the options below. (8R6) A. The author's purpose for this video is to inform viewers that shopping at farmers markets is important. A. The author's purpose for this video is to inform viewers that shopping at farmers markets is important. B. The author's purpose for this video is to prove that shopping at farmers markets is the only way to access healthy food. C. The author's purpose for this video is to present an academic argument in favor of shopping at farmers markets. D. The author's purpose for this video is to present the pros and cons of shopping at farmers markets compared to shopping at conventional grocery chains.
Main Claim	What is the main claim of this video? (8R8, 8SL3) Responses will vary, but may include:

	• it is important to support farmers markets in your local community.
Supporting Point 1	What is one supporting point for the main claim? Highlight one of the options below. (8R8) A. Shopping at farmers markets helps support the farmers who bring communities good, wholesome, clean foods. A. Shopping at farmers markets helps support the farmers who bring communities good, wholesome, clean foods. B. Shopping at farmers markets helps the environment because the food is traveling short distances and there is less fuel required for transporting it. C. To ensure consumers are buying healthy foods, they should only shop at farmers markets. D. Shopping at farmers markets will help consumers enjoy healthier food and pay less for it.
Relevant Evidence Used to Develop Point	What is one piece of relevant evidence that supports this point? (8R8) Responses will vary, but may include: • "It's about having a relationship and taking responsibility for your food." • "There's so much opportunity for us to really acknowledge and honor the people who grow good, clean, whole foods and bring them to us." • "I know that when I show up at the farmers market . . . my dollar is basically going back to the farmer who grew the food." • "We are helping to strengthen our local economy, supporting our neighbors." • "It's up to us to ensure that farmers can continue to do the work that they do and provide us with the fresh, healthy, local food that we all deserve."
Sufficient Evidence	Is the evidence presented in this video sufficient? Why or why not? (8R8) Responses will vary, but may include: • The evidence presented in this video is related to the claim and is sufficient to help viewers consider shopping at farmers markets because the speakers bring up evidence connected to the claim. However, the evidence presented is not sufficient to convince someone to shop at farmers markets. Consumers would need to know more specific facts or details, like how much more specific products cost at a farmers market, or exactly what profits do the local farmers get, in order to be convinced to shop at farmers markets.
Sound Reasoning	Is the reasoning shared in this video sound? Why or why not? (8R8) Responses will vary, but may include: • Although there are connected ideas presented about a claim, there is not enough information presented in this video to support sound reasoning. The information given supports the purpose but does not fully develop an argument with sufficient evidence or sound reasoning.

QUESTION 2

4 points Multiple Choice 

Which piece of evidence is irrelevant to the author's claim? (8R8)

- ☒ A "Freshly picked apples have a deeper color than apples that have been shipped in."
- ☐ B "It's up to us to ensure that farmers can continue to do the work that they do and provide us with the fresh, healthy, local food that we all deserve."
- ☐ C "I know that when I show up at the farmers market . . . my dollar is basically going back to the farmer who grew the food."
- ☐ D "I know that when I show up at the farmers market, the food is local and good for me."

Author's Purpose and Point of View: The Omnivore's Dilemma Note-Catcher

QUESTION 1

4 points Fill in the Blank

As you read *The Omnivore's Dilemma*, analyze the author's purpose and point of view on different topics on food choices.

Section , Page	
What topic is the author addressing in this excerpt? 	
Author's Point of View What is the author's attitude toward this topic? 	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view?
Author's Purpose What is the author's reason for writing this? 	Understanding How does the author's point of view add to our understanding of this topic?
Section , Page	
What topic is the author addressing in this excerpt? 	
Author's Point of View What is the author's attitude toward this topic?	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view?

	•	
Author's Purpose What is the author's reason for writing this? 	•	Understanding How does the author's point of view add to our understanding of this topic?

Note for Evaluating Responses

Section, Page

What topic is the author addressing in this excerpt?

Author's Point of View What is the author's attitude toward this topic?	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view?
Author's Purpose What is the author's reason for writing this? where our food comes from and what is in it	Understanding How does the author's point of view add to our understanding of this topic? how complicated the omnivore's dilemma is

Section 1, Page 11

What topic is the author addressing in this excerpt?

The way we get information about our food today

Author's Point of View What is the author's attitude toward this topic? Our food choices are more confusing now and we don't know whom to listen to.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • experts • People knew about food because they grew it or hunted it themselves. • worrying
Author's Purpose What is the author's reason for writing this? To prove to the reader that we have an "omnivore's dilemma" in how to make good food choices	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand that we do not have firsthand knowledge of where our food

	comes from
Section <u>2</u> , Page <u>49</u> What topic is the author addressing in this excerpt? Source of cheap food	
Author's Point of View What is the author's attitude toward this topic? The cheap food Americans pay for is not cheap at all because their taxes pay for it through subsidies.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • problem • but • don't really • hidden costs
Author's Purpose What is the author's reason for writing this? To educate readers about the hidden costs in agribusiness and how it affects farmers.	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand why farmers do not make a lot of money from their crops
Section <u>3</u> , Page <u>76</u> What topic is the author addressing in this excerpt? Cows as machines	
Author's Point of View What is the author's attitude toward this topic? Industrial feedlots treat cattle as a machine for turning corn into beef.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • I realized once again • That is one way of looking at it.
Author's Purpose What is the author's reason for writing this? To show how cattle are mistreated in industrial farming	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand that whatever happens to cows (how they are treated or fed) impacts us and the environment
Section <u>4</u> , Page <u>89</u>	

What topic is the author addressing in this excerpt?

"added value" in foods—vitamins

Author's Point of View

What is the author's attitude toward this topic?

Companies change foods in various ways so they can sell us more of them.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **We need an apple that fights cancer!**
- **any old chicken**
- **removed**

Author's Purpose

What is the author's reason for writing this?

To explain how companies manipulate consumers into believing they add value to our food

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand how companies make money and why foods are appealing to us

Section **4**, Page **91-93**

What topic is the author addressing in this excerpt?

Eating more food

Author's Point of View

What is the author's attitude toward this topic?

Companies convince us to eat more food, which causes obesity and diabetes.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **scheme**
- **killing us**
- **supersized meals**
- **awful lot**

Author's Purpose

What is the author's reason for writing this?

To inform readers about the dangers of overeating and why we overeat

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand the effect processed foods have on our body and our health

Section **4**, Page **99-100**

What topic is the author addressing in this excerpt?

Government and public health

Author's Point of View

What is the author's attitude toward this topic?

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **mixed messages**

The government is not consistent in how it supports healthy eating.	
Author's Purpose What is the author's reason for writing this? To show the government's role in the health crisis in America	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand why the government funds high-calorie foods more than healthy foods

Section 5, Page 153-154

What topic is the author addressing in this excerpt?
Benefits of organic food

Author's Point of View What is the author's attitude toward this topic? Although it is not scientifically proven, organic food is probably better for you.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • I think the answer is yes. • I can't prove it. • I know.
Author's Purpose What is the author's reason for writing this? To compare the nutrition and taste of organic food with non-organic food	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand why people make choices, despite the higher cost, to buy organic food

Section 6, Page 178

What topic is the author addressing in this excerpt?
Working on a local farm

Author's Point of View What is the author's attitude toward this topic? Local sustainable farming is a lot of work.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • the more weary you feel • left me bone tired
Author's Purpose What is the author's reason for writing this? To point out how labor-intensive it is to farm well and sustainably.	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand how difficult local farming is and why industrial farming is faster and easier.

Section 6, Page 192

What topic is the author addressing in this excerpt?

Industrial farmers

Author's Point of View

What is the author's attitude toward this topic?

Industrial farmers are more concerned with money than conditions for animals.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **don't worry**
- **forcing cows**
- **even when it is unnatural**

Author's Purpose

What is the author's reason for writing this?

To demonstrate how local farms treat animals better than industrial farms.

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand the difference between industrial farming and local sustainable farming

Section 7, Page 214-215

What topic is the author addressing in this excerpt?

Paying more for better food

Author's Point of View

What is the author's attitude toward this topic?

Many Americans are unwilling to pay more for better food.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **Still, whatever the reason,**
- **mixed priorities; pay for other pricey things, just not food**
- **unwilling**

Author's Purpose

What is the author's reason for writing this?

To show how people think about the value and cost of organic food.

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand how people prioritize their spending and food choices

Conflicting Viewpoint

Section 2, Page 49

What topic is the author addressing in this excerpt?

Source of cheap food

Conflicting Viewpoint What is the conflicting viewpoint that is addressed in this section? Cheap corn produces cheap food for Americans.	Author's Response How does the author respond to the conflicting viewpoint? Points out that food is not actually cheap because American taxes pay for the government subsidies used to produce the cheap corn
--	---

Section 3, Page 65

What topic is the author addressing in this excerpt?
Corn-fed beef

Conflicting Viewpoint What is the conflicting viewpoint that is addressed in this section? Cattle should be fed corn.	Author's Response How does the author respond to the conflicting viewpoint? Points out that cattle raised on corn mature more quickly and can be sold for beef earlier, which benefits the industrial farmer, yet cattle have stomachs evolved to eat grass, and eating a diet of grass makes them take longer to mature
---	--

Section 4, Page 89

What topic is the author addressing in this excerpt?
Added value

Conflicting Viewpoint What is the conflicting viewpoint that is addressed in this section? Adding nutritional value to foods is good for the health of consumers.	Author's Response How does the author respond to the conflicting viewpoint? Explains that foods naturally contain nutritional value, but companies remove the nutrition when they process these foods
---	---

Section 6, Page 192

What topic is the author addressing in this excerpt?
Industrial farmers

Conflicting Viewpoint What is the conflicting viewpoint that is addressed in this section? The goal of farming is production and profit.	Author's Response How does the author respond to the conflicting viewpoint? Points out that honoring the way animals live naturally is important
--	--

Homework: Delineate an Argument: The Omnivore's Dilemma, Section 5

Directions

Answer the following questions about delineating arguments after rereading pages 133–134, 147–150, and 153–155 from chapters 10 and 11 of *The Omnivore's Dilemma*.

QUESTION 1

4 points Multiple Choice 

In chapter 11 of *The Omnivore's Dilemma*, Michael Pollan implies the central claim that industrial organic food is better than industrially raised food, yet it still has negative impacts on human health and the environment. Select one supporting point for this claim.

- ☐ A Industrial organic food always tastes better than conventionally raised food.
- ☐ B Research has proven that industrial organic food and industrial food use similar amounts of pesticides in their practices.
- ☐ C Industrial organic food comes from farms that use factory farming practices.
- ☒ D Industrial organic food is better for you and the environment because it contains fewer pesticides than conventionally grown food.

QUESTION 2

4 points Multiple Choice 

What is one piece of relevant evidence that supports this point?

- ☒ A Chemicals from pesticides used on conventionally grown food have been proven to cause cancer.
- ☐ B Pesticide use became widespread in the 1950s, after chemicals used in World War II were found effective for pest control on crops.
- ☐ C Very little research has been done to determine the effects of low levels of these poisons.
- ☐ D More research on the herbicide Atrazine, and its effects on humans, is needed.

QUESTION 3

4 points Multiple Choice 

Read pages 158–159, and select another supporting point for this claim.

- ☒ A Although better for the environment overall, industrial organic food still uses many fossil fuels, which have a negative impact on the environment.
- ☐ B Industrial food systems strip the soil of nutrients, and therefore many foods of healthy compounds that used to exist in them.
- ☐ C Industrial organic food is produced with less energy and fossil fuels than any other food system.
- ☐ D Industrial organic farming is the most sustainable food system consumers can choose.

QUESTION 4

4 points Multiple Select 

What two pieces of relevant evidence support this point?

- ☐ A Soils of industrial farms are often lifeless because the pesticide use strips them of compounds called polyphenols.
- ☒ B Food can travel over 1,800 miles from the farm to your grocery store, and can sometimes come from foreign countries.
- ☒ C Most of the fossil fuels used in the food industry are for processing and transporting food, rather than growing it.
- ☐ D Industrial organic farming uses fewer sustainable practices, like renewable energy, than any other food system.

For ELLs: Author's Purpose and Point of View: The Omnivore's Dilemma Note-Catcher

QUESTION 1

4 points Fill in the Blank

As you read *The Omnivore's Dilemma*, analyze the author's purpose and point of view on different topics on food choices.

Section , Page	
What topic is the author addressing in this excerpt? 	
Author's Point of View What is the author's attitude toward this topic? 	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view?

Section , Page	
What topic is the author addressing in this excerpt? 	
Author's Point of View	Evidence of Author's Point of View

What is the author's attitude toward this topic?	What words or ideas from the excerpt helped you determine that point of view?
Author's Purpose What is the author's reason for writing this?	Understanding How does the author's point of view add to our understanding of this topic?

Note for Evaluating Responses

Section 1, Page 11

What topic is the author addressing in this excerpt?

Where our food comes from

Author's Point of View

What is the author's attitude toward this topic?

It is important and something we should really think about.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- going crazy
- worrying

Author's Purpose

What is the author's reason for writing this?

To educate readers about **where our food comes from and what is in it**

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand **how complicated the omnivore's dilemma is**

Section 1, Page 11

What topic is the author addressing in this excerpt?

The way we get information about our food today

Author's Point of View

What is the author's attitude toward this topic?

Our food choices are more confusing now and we don't know whom to listen to.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- experts
- People knew about food because they grew it or hunted it themselves.
- worrying

Author's Purpose What is the author's reason for writing this? To prove to the reader that we have an "omnivore's dilemma" in how to make good food choices	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand that we do not have firsthand knowledge of where our food comes from
---	--

Section 2, Page 49

What topic is the author addressing in this excerpt?
Source of cheap food

Author's Point of View What is the author's attitude toward this topic? The cheap food Americans pay for is not cheap at all because their taxes pay for it through subsidies.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • problem • but • don't really • hidden costs
Author's Purpose What is the author's reason for writing this? To educate readers about the hidden costs in agribusiness and how it affects farmers.	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand why farmers do not make a lot of money from their crops

Section 3, Page 76

What topic is the author addressing in this excerpt?
Cows as machines

Author's Point of View What is the author's attitude toward this topic? Industrial feedlots treat cattle as a machine for turning corn into beef.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • I realized once again • That is one way of looking at it.
Author's Purpose What is the author's reason for writing this?	Understanding How does the author's point of view add to our understanding of this topic?

To show how cattle are mistreated in industrial farming	Helps us understand that whatever happens to cows (how they are treated or fed) impacts us and the environment
---	--

Section 4, Page 89

What topic is the author addressing in this excerpt?
"added value" in foods—vitamins

Author's Point of View What is the author's attitude toward this topic? Companies change foods in various ways so they can sell us more of them.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • We need an apple that fights cancer! • any old chicken • removed
Author's Purpose What is the author's reason for writing this? To explain how companies manipulate consumers into believing they add value to our food	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand how companies make money and why foods are appealing to us

Section 4, Page 91-93

What topic is the author addressing in this excerpt?
Eating more food

Author's Point of View What is the author's attitude toward this topic? Companies convince us to eat more food, which causes obesity and diabetes.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • scheme • killing us • supersized meals • awful lot
Author's Purpose What is the author's reason for writing this? To inform readers about the dangers of overeating and why we overeat	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand the effect processed foods have on our body and our health

Section 4, Page 99-100

What topic is the author addressing in this excerpt?

Government and public health

Author's Point of View

What is the author's attitude toward this topic?

The government is not consistent in how it supports healthy eating.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **mixed messages**

Author's Purpose

What is the author's reason for writing this?

To show the government's role in the health crisis in America

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand why the government funds high-calorie foods more than healthy foods

Section 5, Page 153-154

What topic is the author addressing in this excerpt?

Benefits of organic food

Author's Point of View

What is the author's attitude toward this topic?

Although it is not scientifically proven, organic food is probably better for you.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **I think the answer is yes.**
- **I can't prove it.**
- **I know.**

Author's Purpose

What is the author's reason for writing this?

To compare the nutrition and taste of organic food with non-organic food

Understanding

How does the author's point of view add to our understanding of this topic?

Helps us understand why people make choices, despite the higher cost, to buy organic food

Section 6, Page 178

What topic is the author addressing in this excerpt?

Working on a local farm

Author's Point of View

What is the author's attitude toward this topic?

Local sustainable farming is a lot of work.

Evidence of Author's Point of View

What words or ideas from the excerpt helped you determine that point of view?

- **the more weary you feel**
- **left me bone tired**

Author's Purpose

Understanding

What is the author's reason for writing this? To point out how labor-intensive it is to farm well and sustainably.	How does the author's point of view add to our understanding of this topic? Helps us understand how difficult local farming is and why industrial farming is faster and easier.
---	--

Section 6, Page 192

What topic is the author addressing in this excerpt?
Industrial farmers

Author's Point of View What is the author's attitude toward this topic? Industrial farmers are more concerned with money than conditions for animals.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • don't worry • forcing cows • even when it is unnatural
Author's Purpose What is the author's reason for writing this? To demonstrate how local farms treat animals better than industrial farms.	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand the difference between industrial farming and local sustainable farming

Section 7, Page 214-215

What topic is the author addressing in this excerpt?
Paying more for better food

Author's Point of View What is the author's attitude toward this topic? Many Americans are unwilling to pay more for better food.	Evidence of Author's Point of View What words or ideas from the excerpt helped you determine that point of view? • Still, whatever the reason, • mixed priorities; pay for other pricey things, just not food • unwilling
Author's Purpose What is the author's reason for writing this? To show how people think about the value and cost of organic food.	Understanding How does the author's point of view add to our understanding of this topic? Helps us understand how people prioritize their spending and food choices

Conflicting Viewpoint

Section 2, Page 49

What topic is the author addressing in this excerpt?

Source of cheap food

Conflicting Viewpoint

What is the conflicting viewpoint that is addressed in this section?

Cheap corn produces cheap food for Americans.

Author's Response

How does the author respond to the conflicting viewpoint?

Points out that food is not actually cheap because American taxes pay for the government subsidies used to produce the cheap corn

Section 3, Page 65

What topic is the author addressing in this excerpt?

Corn-fed beef

Conflicting Viewpoint

What is the conflicting viewpoint that is addressed in this section?

Cattle should be fed corn.

Author's Response

How does the author respond to the conflicting viewpoint?

Points out that cattle raised on corn mature more quickly and can be sold for beef earlier, which benefits the industrial farmer, yet cattle have stomachs evolved to eat grass, and eating a diet of grass makes them take longer to mature

Section 4, Page 89

What topic is the author addressing in this excerpt?

Added value

Conflicting Viewpoint

What is the conflicting viewpoint that is addressed in this section?

Adding nutritional value to foods is good for the health of consumers.

Author's Response

How does the author respond to the conflicting viewpoint?

Explains that foods naturally contain nutritional value, but companies remove the nutrition when they process these foods

Section 6, Page 192

What topic is the author addressing in this excerpt?

Industrial farmers

Conflicting Viewpoint

What is the conflicting viewpoint that is addressed in this section?

The goal of farming is production and profit.

Author's Response

How does the author respond to the conflicting viewpoint?

Points out that honoring the way animals live naturally is important

Opening A: Engage the Learner

Description

Repeated routine: As they arrive, students complete **Entrance Ticket: Unit 1, Lesson 7**.

Prompt students to Turn and Talk about their answers once they have completed the entrance ticket.

Cold-call on students to share out the quotes they identified by asking.

"What quotes stood out to you from the text excerpt? Why?" (Responses will vary.)

With students' support, review information about the history of organic food. Refer to the **Entrance Ticket: Unit 1, Lesson 7 (example for teacher reference)** as needed, and answer any clarifying questions. Tell students that the section 5 reading they do today explains more about the growth of organic food and farming.

Repeated routine: Follow the same routine as with the previous lessons to review learning targets and the purpose of the lesson, reminding students of any learning targets that are similar or the same as in previous lessons.

Work Time A: Read The Omnivore's Dilemma, Section 5

Description

Repeated routine: Follow the same process as with previous lessons for students to read section 5 of *The Omnivore's Dilemma* using the **Text Guide: *The Omnivore's Dilemma* (for teacher reference)**. Instruct students to read the sections independently, and support struggling students as needed. If students do not finish reading the sections within the allotted reading time, distribute Synopsis: *The Omnivore's Dilemma*, Section 5 to each student to review the key details from the section. As time permits, have students identify the meaning of unfamiliar vocabulary, reflect on their reading as they choose, and record the gist on **sticky notes** using the following resources as appropriate: **vocabulary logs**, **academic word wall**, and **Work to Become Effective Learners anchor chart**.

After reading, direct students to find a partner and Think-Pair-Share about the gist they determined and discuss their reactions to this section of text:

"What is the gist of section 5?" (There are pros and cons to industrial organic food. Better than industrial farming methods. Industrial organic food is grown without chemicals. May use similar methods as factory farming.)

"What were some of your reactions to things the author talked about in section 5?"

(Responses will vary, but may include surprise that industrial organic food is grown in large monoculture and industrial/factory-type farms, or frustration that the term free-range is misleading, etc.)

"What questions did this bring up for you?" (Responses will vary, but may mention questions about different labels such as "organic" and "free-range" and what regulations are implied by them, or questions around comparing working conditions between industrial organic farms and industrial farms, etc.)

Allow time for questions, and address any misconceptions students have about these text sections.

Distribute two sticky notes to each student, and prompt students to label one "pros" and the other "cons." Direct students to think about what they have just read, reflecting on the pros (advantages or positives) and cons (disadvantages or negatives) of industrial organic food. Ask students to identify and capture aspects of industrial organic farming that are positive on one sticky note and aspects that are negative on the other note.

Prompt students to Turn and Talk, showing their sticky notes to one another and discussing the following questions:

"What is one pro related to industrial organic farming?" (Responses will vary, but may reference that the food is grown without pesticides or chemicals, which makes it better for the environment, animals, and humans.)

"What is one con related to industrial organic farming?" (Responses will vary, but may reference that since the food is produced in an industrial setting, the practices of animal treatment and feeding may resemble those on factory farms and use large amounts of fossil fuels.)

Use **equity sticks** to collect answers from the group, and discuss responses.

Work Time B: Delineate Arguments: The Omnivore's Dilemma, Section 5

Description

Review the learning target relevant to the work to be completed in this section of the lesson:

*"I can delineate and evaluate the argument in **The Omnivore's Dilemma**, assessing whether the reasoning is sound and the evidence is relevant and sufficient."*

Display and distribute the **Delineate an Argument: The Omnivore's Dilemma, Section 5 graphic organizer**. Tell students that they will continue the work they started in Lesson 4 around identifying argument and analyzing evidence and reasoning, but instead of working on this as a class like they did last time, they will work in partners.

Explain to students that before they dive in and delineate the argument from this section, they should pause and identify Michael Pollan's point of view and purpose for writing this section of text. Instruct students to retrieve their copies of the **Author's Purpose and Point of View: The Omnivore's Dilemma note-catcher**, and invite them to Think-Pair-Share:

"What is Michael Pollan's point of view in this section of text?" (Michael Pollan believes that industrial organic farming practices are far removed from the original intent behind the organic food movement. He thinks industrial organic farming is better than industrial farming practices, but only slightly better.)

"What is Michael Pollan's purpose for writing this section of text?" (Michael Pollan writes this section to inform people about some of the realities of industrial organic farming practices.)

Direct partners to read the first question from the **Delineate an Argument: The Omnivore's Dilemma, Section 5 graphic organizer** aloud together, discussing the choices presented for the main claim of this section of text. Use a total participation technique to share out student responses:

"What is the main claim of this text?" (Students should identify the correct response from the choices: "Industrial organic food is only a partial improvement over industrially produced food.")

Ask students to identify how they selected this main claim from the choices provided and share out responses to the group, encouraging them to reference the **Strategies to Answer Selected Response anchor chart** in their response. Note any high-leverage strategies that students used to select the claim.

Remind students about the purpose Pollan had in writing this section of text on industrial organic farming, and prompt them to think about how understanding the purpose can help a reader determine the claim.

Invite partners to preview the rest of the **Delineate an Argument: The Omnivore's Dilemma, Section 5 graphic organizer** together, making sure to note for students that some questions are selected response and some require constructed responses. Remind students that their task is to identify supporting points that align to this claim, determine evidence that is relevant, analyze the sufficiency of evidence and the soundness of reasoning, and note how Pollan acknowledges conflicting viewpoints.

Direct students to review the **Work to Effective Learners anchor chart**, and prompt them to identify a goal they have regarding effective collaboration for the remainder of this work time.

Field any questions students have about the task, and prompt them to complete the graphic organizer with their partner.

As students work, circulate and use the **Delineate an Argument: *The Omnivore's Dilemma*, Section 5 graphic organizer (example for teacher reference)** as needed. Ensure students have named the correct supporting points, are identifying relevant evidence accurately, and are analyzing the soundness of reasoning used by Pollan in this section of text. Pull small groups of students who may need more guidance selecting supporting evidence. As needed, work with students on the final section of the note-catcher on soundness of reasoning.

Display the example response for the sufficient evidence question from the **Delineate an Argument: *The Omnivore's Dilemma*, Section 5 graphic organizer (example for teacher reference)**. Cold-call on one student to read the response aloud. Explain to students that this is a model response because it names whether or not there is enough evidence and explains how that evidence connects to the claim. Direct students to Think-Pair-Share with their partner:

"How is the example response similar to or different from your response?" (Responses will vary, but should name how their own response names (or does not name) the sufficiency of the evidence and comments on how the evidence connects to the claim.)

Focus students on the example response for sound reasoning on the **Delineate an Argument: *The Omnivore's Dilemma*, Section 5 graphic organizer (example for teacher reference)**.

Cold-call on one student to read it aloud. Explain to students that this is a model response because it describes how the writer used connected sentences to describe the evidence and relate it to the supporting points, while also helping the reader connect the evidence to the main claim in order to see its validity. Direct students to Think-Pair-Share with their partner:

"How is the example response similar to or different to your response?" (Responses will vary, but should describe how their own response names (or does not name) the soundness of reasoning in this section of text.)

Prompt students to return to their pro and con sticky notes, adding any new information to each note and saving them for use in Closing and Assessment A.

Repeated routine: Invite students to reflect on their progress toward the relevant learning target.

Closing and Assessment A: Delineate an Argument: "Farmers Markets" Video

Description

Review the learning target relevant to the work to be completed in this section of the lesson:

"I can delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced."

Explain to students that they will now practice delineating arguments and identifying relevant evidence from a video instead of a text. Give students a moment to think about how it might be different to do this work with a video, and then direct students to Turn and Talk:

"What strategies might help you determine the argument, points, and relevant evidence as you watch the video?" (Responses will vary, but may include jotting down notes, watching the video multiple times, talking with a partner, etc.)

Tell students that the video they will watch today is on farmers markets. Although this video is not directly related to their reading from today's excerpt from the anchor text, it presents an important argument on the topic of food choices that they will analyze.

Project the video, and explain to students that they will watch the video through one time for gist before trying to delineate the argument. Begin watching the **Video: "Multiple Voices: Farmers Markets"** together. As it ends, prompt students to discuss the gist of the video with their partners.

Ask students to Think-Pair-Share:

"What is the gist of the video?" (Farmers markets provide healthy food to a community and support local farmers.)

Play the video one more time, prompting students to be thinking about the main claim, supporting points, and evidence presented. Make sure students know they will need to be particularly careful as they watch the video for a second time and determine the claim and use the strategies they mentioned earlier. Invite students to fill out the optional **Delineate an Argument: "Farmers Markets" graphic organizer** prior to their discussion.

Prompt students to join with a partner, and lead them through the following series of questions. Use the Back-to-Back and Face-to-Face protocol, and prompt students to find a new partner after each question given below.

"What is the purpose in the video we just watched?" (The speaker hopes to inform viewers of the importance of farmers markets.)

"How can understanding this purpose help you identify the speaker's claim?" (Responses will vary, but may include: knowing the purpose helps viewers narrow down and identify the claim because they know the speaker's intention.)

"What is the main claim of this video?" (Responses will vary, but may include: it is important to support farmers markets in your local community.)

"What is one supporting point for this claim?" (Responses will vary, but may include: shopping at farmers markets helps support the farmers that bring communities good, wholesome, clean foods.)

"Name one piece of supporting evidence." (Responses will vary, but may include: "It's about having a relationship and taking responsibility for your food."; "There's so much opportunity for us to really acknowledge and honor the people who grow good, clean, whole foods and bring them to us."; "I know that when I show up at the farmers market . . . my dollar is basically going back to the farmer who grew the food."; "We are helping to strengthen our local economy, supporting our neighbors."; or "It's up to us to ensure that farmers can continue to do the work that they do and provide us with the fresh, healthy, local food that we all deserve.")

"Is the evidence presented in this video relevant and sufficient?" (Responses will vary, but may include: The evidence presented in this video is related to the claim and is sufficient to help viewers consider shopping at farmers markets because the speakers bring up evidence connected to the claim. However, the evidence presented is not sufficient to convince someone to shop at farmers markets. Consumers would need to know more specific facts or details, like how much more do specific products cost at a farmers market, or exactly what profits the local farmers get, in order to be convinced to shop at farmers markets.)

Explain to students that they will watch more of these videos during this unit as they learn to delineate and evaluate a speaker's claims. Many of the videos have a similar purpose—to inform their audience about a particular topic related to farming, health, and food choices. Although the videos do present a claim that is supported by some evidence, these short videos are not long enough to have a fully developed argument, and because of this, the reasoning offered will be minimal. Students should keep this in mind as they complete graphic organizers in future lessons while watching videos.

As time permits, direct students to review their **Entrance Ticket: Unit 1, Lesson 7** and discuss any similarities and differences between farmers markets and the original concept of organic food they read about in Opening A with their partner.

Repeated routine: Invite students to reflect on their progress toward the relevant learning target.

Invite students to reflect on the habits of character focus in this lesson, discussing what went well and what could be improved next time.

Meeting Students' Needs

For lighter support:

As students watch **Video: "Multiple Voices: Farmers Markets,"** encourage them to generate a list of unfamiliar vocabulary that they hear while watching. After watching the video for the first time, allow students to work in groups to determine the meaning of unfamiliar vocabulary before viewing for a second time.

For heavier support:

Print a transcript of the video for students to annotate while viewing. This will allow students to refer back to the information provided while delineating an argument. For the heaviest support, provide a translated version of the transcript for students to compare to the English-language version to help deepen understanding of the content.

Homework A: Delineate an Argument: The Omnivore's Dilemma, Section 5

Description

Students answer selected response questions to complete **Homework: Delineate an Argument: *The Omnivore's Dilemma*, Section 5**.

Homework B: Preread Anchor Text

Description

Students preread *The Omnivore's Dilemma*, Section 6 (pages 168–171, 178–180, and 192–196), in preparation for studying an excerpt from the section in the next lesson.
